

MEMORANDUM

TO : DFD/TPE via BM/SGN
FROM : MF/PW-SGN
SUBJECT : Monthly Report (February 1971).

DATE : 9 Mar. 1971

REF. No. CP-V-71-127

The 20AB program for the month of February was routine for RW/SVN. Flying time for the month remained relatively the same. It is believed the monthly flying time will remain at the present level until the VN Customer and Taipei work out hazardous pay.

There were 2 Route Checks, 5 Proficiency Checks, 8 F/O Evaluation rides. This brings the program up-to-date.

A Pilots Meeting was held on the 28 Feb. in which 14 Pilots attended. The rest of the Pilots who did not attend will be briefed on the meeting throughout the month of March.

All the First Officers are progressing in a normal manner. Their attitude and initiative is well above average.

The morale of the pilot seems to be as in previous month a problem. There seems to be some strong rumblings among the Captains and First Officers and a curious silence about, what the company is going to do about extra - hazardous flight pay; also rumors have it that the twin pack will not come up for Bid. The lull before the Storm???
